

Sprint system

Patented Retail Automatic POS Solutions

SPRINT SYSTEM IS OUR PATENTED RANGE OF
CARDBOARD DISPLAY STANDS

- Automatic assembly within seconds
- Compact flat-pack design for easy transport and storage
- Up to five times smaller shipping volume than conventional display stands
- Extensive range of sizes, shapes, and configurations
- More than 1,000 design possibilities
- Fully customisable according to client requirements
- Cost-effective thanks to in-house manufacturing
- Fast and simple installation directly at the point of sale

SPRINT SYSTEM

THE DISPLAY SYSTEM THAT SAVES YOU MONEY A SYSTEM THAT ADAPTS TO YOUR BUSINESS

In June 2015, Sprint Trading acquired the worldwide patent licence for the manufacture of an innovative cardboard display system that automatically folds and unfolds while remaining compact for transportation and storage. SPRINT SYSTEM is a premium display solution that perfectly complements our portfolio of POP/POS cardboard and plastic displays. Designed for today's demanding retail environment, it combines outstanding functionality, modern design, and exceptional logistics efficiency.

WHY CHOOSE SPRINT SYSTEM?

Innovation should simplify business. Every SPRINT SYSTEM display has been developed to reduce installation time, lower logistics costs, and improve efficiency at the point of sale. As retail environments become increasingly competitive, brands need display solutions that attract attention quickly, are easy to install, and maximise selling performance. SPRINT SYSTEM delivers exactly that.

...FAST, SIMPLE, ECONOMICAL, FLEXIBLE, MODERN

Ultra-Fast Installation.

- Simply release the locking mechanism or pull the designated section, and the display automatically unfolds into its final shape within seconds.

Easy Assembly. No specialist skills or training required.

- One person can assemble the display in just a few seconds (traditional display stands often require up to 20 minutes of assembly and several trained installers.)

Lower Logistics Costs. Transport products—not empty space.

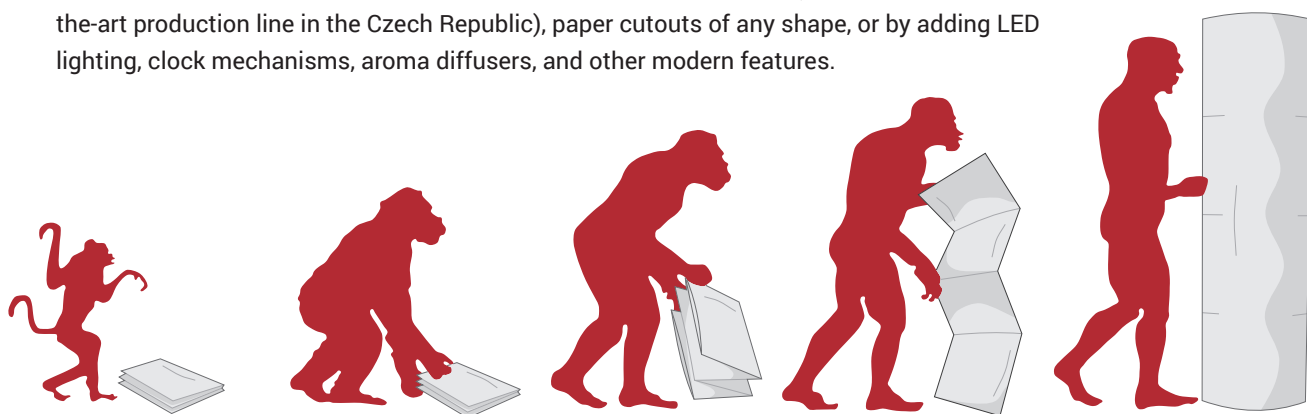

- SPRINT SYSTEM displays are supplied flat-packed, dramatically reducing transport volume.
- A standard passenger car can easily carry display units for one or even several retail locations. Compared with conventional display systems, transport volume can be reduced by up to five times.

Flexible Design. Every display can be tailored to your project.

- Depending on the structural design, load capacities can reach several tens of kilograms. Choose from hundreds of possible: shapes, sizes, configurations, graphic designs, structural solutions, etc.

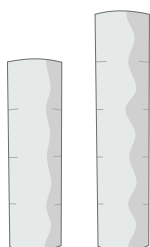

Modern Retail Design. Designed to attract attention—and increase sales.

- The appearance can be enhanced with vacuum-formed plastic parts (we operate a state-of-the-art production line in the Czech Republic), paper cutouts of any shape, or by adding LED lighting, clock mechanisms, aroma diffusers, and other modern features.

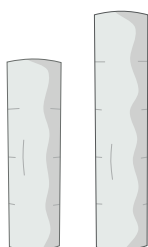

TOTEMS

Circular totem
